HARVEYBLOOM

The Netherlands: gateway to the EU

With 448 million inhabitants the EU is an important market for companies that seek to expand their customer base. As a member of the EU, The Netherlands offers a pro-business climate, a strategic location, an attractive tax system, a highly educated multilingual workforce and superior infrastructure to set foot into the European market.

Home to foreign companies

The Netherlands is home to more than 7500 foreign companies and ranked fourth in the world by Forbes' Best Countries for Business. With the largest harbor of Europe in Rotterdam and Amsterdam Schiphol airport, The Netherlands provides the perfect hub for the European market. The Netherlands is also the digital gateway to Europe as it links Europe directly to the USA via various direct transatlantic internet connections to The Netherlands.

High education and skills level

The Netherlands has a highly productive, skilled, flexible and multilingual workforce. Dutch adults are above average proficient in ICT (2nd position), literacy (3rd position in a study of 35 countries) and numeracy (5th position) according to OECD in 2017. Many foreign workers live in The Netherlands. And finally, The Netherlands ranks second out of 88 countries on the EF English Proficiency Index 2018.

Stable Base

The Netherlands is historically one of the most stable nations in the world and the government is one of the most effective in the world according to the World Bank. Government finances are healthy. In 2019 the government has a budget surplus and government debt is below 50 percent. Thanks to the so called "polder model", the pragmatic approach to business and the stability of the Dutch government, little time is lost to labor relations and labor disputes compared to other countries in Europe.

Attractive Test Market

The Netherlands has an attractive market with an open culture and adaptive consumers. Ranked second on the Global Innovation Index 2018, the Dutch industry has many knowledge-intensive and innovative companies with a worldwide reputation. The Netherlands is a premier R&D center. The Netherlands had the second highest number of patent applications per million inhabitants in 2017 in Europe.

Research-friendly and innovative

A strong connection between government and universities boosts a vibrant startup scene. Dutch universities score high in international rankings in areas such as green biotechnology and biomedical life sciences.

Supportive tax climate

The Netherlands offers a supportive tax climate for international companies, a wide tax treaty network and special measures for highly skilled expats. With the TAX Office, we can provide certainty in advance about interpretation of tax laws — just a few of the features that help multinational companies to thrive in The Netherlands.

Your business partner HarveyBloom

Legal incorporation

Setting up a corporation or another legal entity in the Netherlands can often be straightforward and low-cost. We can show you how.

International tax advice (also intra-EU)

With us, you do not need a separate tax expert, we have experienced specialists in house. And due to our innovative structure, at reasonable rates.

Governance advice

You will want to run your foreign operation in a way that matches the way you like to do business. Some things will inevitably be a bit different, but we can find the best solutions for you in the EU with the best match for your existing business.

How to do it “right” on Privacy, Communications, Logistics, EU rules

Much is made of those topics, but if you take them into account from the beginning there is usually little trouble. We help you to scan the options and avoid unwanted surprises later.

We have our own USA business experience

Several of our partners and associates have extensive working experience with and in USA firms, or have participations in USA firms. That means we understand your objectives and culture.

Operations and Logistics experience

Would your business need warehousing, transport and logistics, or EU support offices in various places? The Netherlands is a great place to run that from, and we can point you in the right direction, help you to set it up and make sure you get the know-how to make use of the EU trade zone in the best way.

Communications and Marketing advice

The Netherlands is a place where English gets you a long way, but there are massive EU markets where you will need local language marketing and communications advice. We have very experienced associates who can help you do that.

Fantastic network

Our innovative setup also means we have a huge business network. We can work with you to find the business contacts that would help you best, in the Netherlands but also in many other EU countries. We also have good contacts with governmental investment support agencies and similar instances which enable us to obtain for example bank accounts and visa more quickly.

UNIQUE STRUCTURE

Our firm once started as a law firm, but then we added more and more other specialists to be able to help our clients. First tax, now a whole range of skills and competencies. Today, we are still a law firm – but mostly a multifunctional cooperative, focused on all your needs.

We have strong expertise in Energy, Innovation, IT and Finance
